Drug Screen	\$25
Prescription Prior Authorization	\$25
Professional Letter	\$20-50
Medical Records	\$35
Form Completion	\$20 per page

General pricing guidelines:

For patients being treated for ADHD or on chronic controlled substances

I usually see patients for an initial visit +drug screen (\$375). The first follow-up appointment is in 2 weeks (\$150). If all is going well the next appointment +drug screen will be in one month (\$175). For those stable, the next appointment +drug screen will be in three months (\$175). Some patients may be allowed to follow-up every 6 months for face to face visits, but will still require a drug screen and medication refill appointment every other 3 months. Example: These individuals will pick up 3 prescriptions + drug screen (\$90) three months from the last appointment and then have a follow up appointment + drug screen (\$175) in another 3 months.

For Suboxone Patients.

The same guidelines as above, except most suboxone patients will be seen MONTHLY and will have a drug screen (\$175). If an individual has remained stable for some time and has a partner or family member that I feel can let me know if the patient is having any problems, I may allow 2-3 month follow-up visits +drug screen (\$175).

PATIENTS MAY BE REQUIRED TO HAVE MORE FREQUENT OFFICE VISITS AND DRUG SCREENS DEPENDING ON NEED FOR MORE INTENSIVE MONITORING.
