Suboxone patients are seen monthly

ADHD patients are seen at least weekly until stabilized. Once stabilized, the usual visits are every three months. These visits alternate with seeing the doctor and the nurse.

Occasionally, patients request a one or two-week extension of medications because of a missed appointment or a holiday. These extension requests, if approved, include a charge of \$50 per week.

Prior authorizations for medications by insurance are completed by our office and are included in the regular fee unless these authorizations require an unusually long process. We reserve the right to charge an additional fee of up to \$50 per hour needed to complete these unusual requests.
